

Getting Started is Easy

Fill in some basic information such as your First Name, Last Name, Mailing Address and Phone Number. Agree to the Terms of Use and Privacy Policy. On the next screen, confirm your address is the property you're selling or uncheck the box and type in the correct address. Set up your email and password and click "Finish Creating Account".

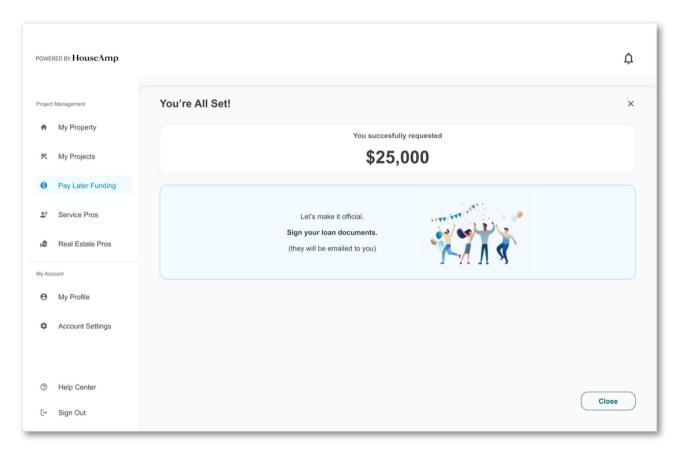

If you accepted an invite from your real estate agent, you will be automatically connected to them. Otherwise, follow the steps <u>here</u> to get connected to your agent.

Apply for Funding

Answer a few preliminary questions to see your lender and rates/terms. If approved, you can start working on projects within days—not weeks. Use the funds for staging, painting, major renovations, moving costs, and more!

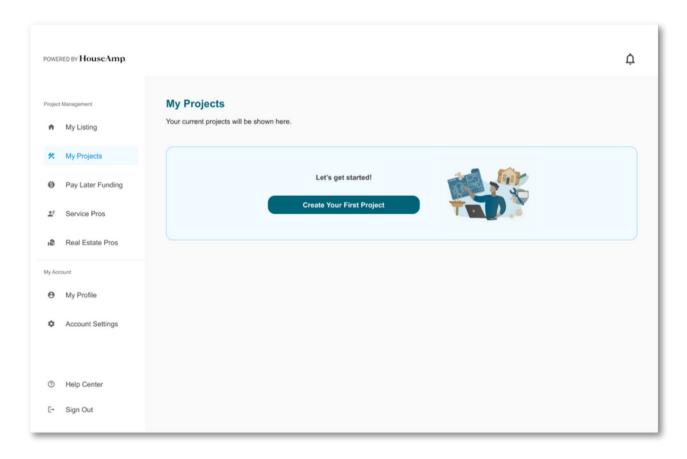

For more information on the application process, see Application Walk-Through.

Create Your First Project

You can work with your preferred service providers on whatever projects you choose. Manage your project yourself, or choose a turn-key provider. Create a new project for each different service provider you'd like to work with.

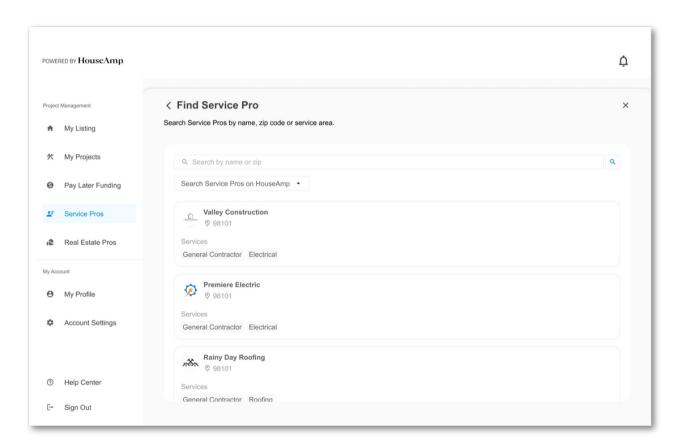

For more information about creating projects, see **Creating Your First Project**.

Invite Your Service Provider

Once your project is created, you can invite your service provider if they're not already on the platform. Or, if you're looking for a new service provider, search by name, zip code or service area for a provider already on the platform.

For more information about service pros, see <u>Assigning a Service Pro to Your Project</u>.

Approving Work and Paying Service Pros

Once your service provider has accepted the connection to your project, they can upload an estimate for you to approve, and then start work! To pay your service provider, they upload an invoice to the project, and you can review and approve it. Invoices approved by EOD Tuesday are paid out weekly on Friday.
